

PASSIONFORTRUTH

WHERE NEW LIFE BEGINS

APRIL 8TH ECLIPSE

Ladies and gentlemen, listen to what's about to happen on **April 8th of 2024**, it might have incredible implications for your life. First of all, **CERN** is going to be starting up their **Hadron Collider** to collide two atoms to produce what they're looking for, **called 'the God particle'**. Not only that, NASA is launching rockets into the Eclipse, and they call the mission after an *Egyptian serpent deity*. The *cicadas* are coming by the billions, first time since we've seen them since 1803, covering a large swath of the United States of America. *Red heifers* are about to be sacrificed in Israel for the first time in 1000s of years setting the pages of prophecy on fire. There's a massive solar eclipse coming across the United States, forming an **X-marks-the-spot** in Southern Illinois; *that's got to be prophetic*. Not only that, but we've also got wars and rumors of wars, and more that we're going to talk about in this broadcast, right after this.

Hello, everyone, I'm Jim Staley, with **Passion For Truth** ministries, and this video is critical. There are so many things that are happening on April 8th, some of them might be coincidence, some of them are just downright strange, and some of them are no question, potentially life-altering in the spiritual realm, as the pages of prophecy begin to unfold right before our eyes. So, this video is going to be important for you. Many of you have watched, maybe for the very first time, a video about the solar eclipses that I did just a couple of weeks ago; that video has skyrocketed to be the most watched video on the internet with over 3 million views in just 14 days. If you have not seen that video, it really will open your eyes to God's prophetic Feast Days, His prophetic calendar and why He keeps doing things on what we call today, the 'Jewish calendar'. But in reality, it's the Biblical calendar that He holds to. In this broadcast, we're going to dive into more things that I've discovered, the things that had been highlighted to me that's going to happen this April, around the time of Passover, and specifically April 8th, on the solar eclipse day. It's just downright amazing and so we're going to talk about that.

And first and foremost, if you've not subscribed to this channel, do so right now if you want to see more videos like this, and videos that will teach you about the '**Front of the Book**'. The entire point of this ministry is to teach believers around the world, what I call the 'Front of the Book', The Old Testament and how it relates to the 'Back of The Book'. If we don't understand the 'Front of the Book', if we don't understand Torah, if we don't understand the original Judaism in the first century and all that Hebraic backdrop from which the Bible was written, how can we possibly say that we understand anything at all? We're likely going to read into it our western, Greco-Roman mindset, and that is just a definition formula for disaster. And that's where we've been the last 17-1800 years, as the ancient Roman Church has really fed us and watered down the Scriptures, to a place where, sometimes, we just need to get back to doing '**Bible things in Bible ways**'. So if you want to learn more about the Bible, from the original perspective, this is your channel.

In the meantime, let's start off with **CERN**. CERN is an international body of scientists that have developed the largest Hadron Collider in history. It is a 17-mile, 300-foot-underground tube that's designed to put particles in opposite directions, going at seven miles-an-hour under the speed of light, and then collide them, which is extraordinarily difficult. It's like shooting a bow and arrow at 100 yards away from your opponent and hitting the tips just perfectly, where they explode. That's what they're trying to do. And why are they trying to do this? Because they believe if they can get these particles to go at the speed of light, and eventually come and collide with one another, then they will discover what's called the 'antimatter' or the 'dark matter', of what is holding together matter to begin with. They know it's there, like, you know, gravity is there, but you can't really see it. They know it's there, but they have never been able to capture it. They call it the 'God particle'. They want to discover what's holding this universe together. Ladies and gentlemen, it's just very simple, open up your Bible and save billions of dollars. The Word-Made-Flesh is what's holding this entire universe together. Amen. But they want to find the 'God particle', and in that process, there's a lot of danger that's been speculated around this particular instrument, because this entire instrument and this practice has the potential of creating miniature black holes. Now they say there's nothing wrong with that, it's not going to happen, and even if it is, they're microscopic, and there's no problem, but they've never done it before. So how do you know that a microscopic wormhole won't pull the entire United States, or the entire world, I should say, into it. And off we go.

Now, thank God we know that's not how it ends, because the Bible tells us the end from the beginning, but this is what's crazy: number one, CERN was founded on September 29th 1954, and it might not be a number that means anything to you, but as a Bible guy that goes back to the original language and understands the Hebrew calendar, the Biblical calendar, and the seven Feast-days of the Lord, that are all about the first the second coming of Messiah, I went back and found out that September 29th 1954, was literally on the Feast of Trumpets. Now that's really critical, because today it's called Rosh HaShana. It's the civil year of modern-day secular Judaism, but in biblical times, this was the day that kings were inaugurated in Israel. So if a king came into his kingdom, in Israel, let's say in February or November, it wouldn't matter, he wouldn't get crowned King until on Tishrei 1, the seventh...the first day of the seventh month of the Biblical calendar, that's when kings were coronated. And we know that this is when King Jesus, King Yeshua it is going to be inaugurated as well.

It's the times and the seasons. Genesis chapter one, verse 14 says that He '*put the sun moon and the stars in the skies, for signs and for seasons*'. That Word 'signs' in Hebrew literally means 'omens' or 'warning' and 'seasons' doesn't mean spring, winter, summer fall, it literally means '*moedim*', the appointed Feast-Days of the Lord, that we're supposed to know when to meet with Him on these days. All of these that we do, every single year, for those that do this, they're wedding rehearsals, they're dress rehearsals for that great Wedding Banquet in the sky, when He comes. We need to know these things and understand these things. Now, why is this so important?

Because CERN is about to start up the Hadron Collider. Ladies and gentlemen, on April 8th, on the day of the biggest solar eclipse in American history, where millions of people are flying from around the world, they are going to collide these Hadron atoms, these protons, these electrons are going to be collided on this day. Now, why in the world would they choose April 8th to do this? I have no idea. But this company is creepy on every level and I'll tell you why. Not only is

CERN, in Switzerland...But I want to show you this, because this is cause for, in my opinion, a cause for alarm. And here's why. If you take a look at where it's actually at, okay, a large portion of CERN is located in the territory of Saint-Genis-Pouilly, probably not pronouncing that right. In Roman times, it was called *Apolliacum*. The town and the temple were dedicated to Apollyon, the destroyer. So, this is ancient Horus, this is Shiva. The town Apollyon literally is dedicated to the god of destruction, the god of chaos, the destroyer, and this entire hadron collider is right in the middle of Apollyon.

Now, why is that so important? Because if you go to the book of Revelation, this is what we read. It says in chapter nine, verse one, two and 11, ***“To him was given the keys of the bottomless pit and he opened the bottomless pit, and they and they had a king over them, which is the angel of the bottomless pit, whose name in the Hebrew tongue is Abaddon, but in the Greek tongue, his name is Apollyon.”*** Now, you might not find that just a coincidence, but the fact that they're...they've got this Hadron Collider, which some people, even very, very important, scientists are scared out of their mind of what is going to happen. Now, CERN will tell you on their website, we have no intention of doing anything wrong. Who has intention of blowing up the world? Who has intention of accidentally cracking open a time-space continuum and having something on the other side? Well, I believe they're not telling the full truth, the whole truth and nothing but the truth. So take a look at this quote straight from the director of research at CERN, concerning the exact purpose of this Hadron Collider. Listen to this, quote, “something may come through dimensional doors at LHC, the Large Hadron Collider, and out of this door might come something, or we might send something through it.” Ladies and gentlemen, the purpose of CERN, they tell you, it's all for scientific research. No, they're looking for the 'God particle', they want to know what's holding the universe together, and ultimately, they're trying to get into time-travel, they want to open up the curtain of what is behind our dimension and get into the multiverse. This is what they're after.

They believe there are multiple universes, happening in parallel to one another simultaneously, and they want to tear that open, and they know that something has the potential of coming through it. Now we just read out of the book of Revelation that Apollyon comes out, that the doors of the deep, or the gates, are opened up, and crazy things come out of the deep. Could it possibly be? It wouldn't be that much of a stretch to say that, maybe, we're the ones that do it, maybe in our effort in mankind, to find a wormhole, to get into 'Star Trek-world', to discover more and more and more and more, like the Tower of Babel, that eventually, maybe, we actually do open up the space-time continuum, we open up the doors of the second dimension, and the demonic realm comes alive onto this earth. It's very possible. They just said, that's exactly what they know is possible. So for...what's really fascinating is evolution is dead, that scientists at the highest level now know there is a spiritual realm, there is another dimension beyond ours, and they're trying to tap into it. And my friends, the last time this happened was the Tower of Babel and it didn't go over to well for them. Take a look at the actual icon. This is the logo that CERN has. Now a couple of things that I noticed about this logo, you might have seen this on the internet, but I think it's really, really worth taking a look at. Number one, they say that this is a Hadron Collider, going into circles, but to me, this looks eerily like a solar eclipse, or a lunar eclipse that's happening right in front of us. And to if you take these...this symbol, and you just unmix them, you take them apart, here's what it looks like. These are actually...it's ***three sixes*** put together. Their logo is three sixes put together. Now, you might say, 'Oh, that's a conspiracy', 'Oh, that could have been this, could have been that'. I'm here to

tell you that the devil does not come out blatantly and say, 'Oh, by the way, I'm going to use this company to represent me and bring on the Antichrist', no, he does things always subliminally.

So there's always a mixture. It's a Tree of Knowledge of Good and Evil. So you've got the truth, right, which is, 'Oh, yes, they're doing this for scientific reasons, they probably have no nefarious motives whatsoever'. Right, we're to believe that, but the devil is involved in the details and he's always hidden in plain sight. And I do believe...*my personal opinion*, I could be wrong, oftentimes, I am, but at the end of the day, you can be the deciding factor of what you believe. But to me, trying to break open the spiritual realm and send somebody to the other side and bring something from the other side, and an entity, excuse me, a company that has a logo that has three sixes put together to make it look like a...sounds like something, exactly what the enemy would do. And here's what's fascinating, the only company that I know of in history that's international in nature, that, right outside the doors of this facility, in CERN, is the statue of Shiva. Now, they will tell you, 'Oh, this was given to us by the scientific community from India', and that's true, but they **don't have a sta...**Can you imagine if the Christian scientists decided to give them the 10 commandments and... would they have that displayed outside of CERN? No, not at all, you know that would not be true. They are discriminating here on one level, and they are telling you in plain sight, this is what we believe now. Who is Shiva. She is...it's actually not even a she, they say it's a she, but it's actually a guy, but it's actually mixed a guy and a girl. Sounds like a trans to me, thousands of years old, right out of the mind and the playbook of the enemy, and she is the goddess of destruction, and rebirth. So her job is to destroy and then recreate, and that's exactly what Satan wants to do, he wants to destroy what God did and then recreate it in himself. And so, Shiva is doing a dance with fire...okay, we know how the end of the world ends, according to the book of Revelation and the prophets...and Shiva is the god...there's so much in it. I encourage you to go look at just Shiva and all the prophetic symbolism of what that goddess looks like and what all these...what she's doing right here represents.

But this is outside of CERN. And listen to this. This is a plaque that's right next to the statue. This is what it says. Now for those that just believe all of this is just given by the Indian government, okay. If so, why is these words on this plaque? Quote, "1000s of years ago Indian artists made the image of the Lord Shiva absorbed in the dance from the copper chain. Today in our time, all physical scientists are again using advanced technologies to create the format of cosmic dance. At present, scientists theorize of a cosmic dance actually stands on the foundation of ancient myths, religion, art and physics. Modern physics tells us that the process of creation and cataclysm is not just linked to the beginning and end of life in the universe, but to the particles of the whole creation". In other words, ladies and gentlemen, this was quoted by a top scientist, on a plaque right next to this Shiva statue that is validating that Shiva is the perfect representation of what we're doing. The particles dance on a microscopic level, and it's all connected to religion. It even says it in there, that religion, art, physics, all of these things are mixed together, they're all connected. This is where the string-theory comes from, they believe it's all connected.

So this is incredible, what's happening on April 8th, and that's just one component. Well, that's what I think anyway. But you tell me what you think right now, put '*from God*' in the comments, if you believe that Hadron Collider is from God, or put '*from the devil*', if you believe that Satan is going to use this at the end of time. Let me know right now, in the comments below. Ladies and gentlemen, we just, again, talked about, so I'm not going to go into great detail of a 33-minute

video on the solar eclipses over America from 2017 and 2024, and the prophetic significance of those, and the historical, crazy things of war and earthquakes that happened. And again, I'm not trying to scare anyone. My job as a watchman on the wall, as a shepherd of the people of God, as a researcher, is to let you know, these are the things that are happening, or about to happen, maybe we should just keep an eye on these things, maybe be prepared. There's nothing wrong with having extra food, extra gas in your car. As a matter of fact, state officials are now coming out across the United States and telling people keep your kids out of school, make sure that you're you have extra gas and extra food. For the first time in American history, we have a solar eclipse, and the state government is saying, 'Hey, by the way, you might want to not keep your kids in school that day, you might want to have some extra fun'. Why are they telling us to have extra food and have extra gas in our car, if nothing...they're not afraid of anything?

When I was in school in third grade, I remember a solar eclipse. We came outside of my Catholic school, we looked at the solar eclipse, we went back in, probably had recess right after that. It was no big deal, but today, they don't want people in school, they want you to have extra food, something is amiss. And on top of that the National Guard is being released and instructed in all of these cities across the United States as some sort of precautionary measure. For what...is the question...is the precautionary measure? They've never done this before in history, modern history. Something...they know something that we don't know. Again, I'm not saying that anything is going to happen. I'm not a prophet, but what I can tell you is, prophecy says that in the end days, there'll be wars, there'll be rumors of wars, and crazy things like this will happen. Earthquakes will happen, the sun and the moon will go dark, that's about to happen on April 8th. And so something might be birthed in the prophetic realm. And we'll talk more about that a little bit later.

But let me show you this. NASA on April 8th, not April 9th, not April 7th, April 8th, is going to be launching three rockets into this solar eclipse for all kinds of research purposes. And that's fine, all dandy. But why in the world would they have to name this mission after an Egyptian god called Apep, which is the nemesis of Ra, the sun god. This is the god of destruction and chaos and darkness. So they name this mission after the god of darkness that swallows up Ra, the solar god, which is I guess, the 'Eclipse wink' that NASA is doing. And I think it's fascinating that all of these things are happening at one time. Now you might say oh, it's just a coincidence, but you've got the devil's comet showing up on April 8th, first time in 71 years. You can go outside, right now, on the horizon, if you're live in the United States, look towards the west towards the setting sun and you'll be able to see the...you should be able to see, on a clear night, the comet. Now the last time that we had a comet ladies and gentlemen with an... two solar eclipses that formed in X over the United States was an 1811, and three months later was the largest continental earthquake in the history of the United States. So large, it caused the Mississippi river to flow backwards and the liberty bell rang on the East Coast.

This is a serious, serious thing that's happening and now we've got a Hadron Collider that's trying to collide two atoms together to form whatever they're trying to form, find the God Particle, open up the space-time continuum. Could they do it on that day? They're saying between that day and by April 22nd, which happens to be Passover, they're expecting on April 22nd, for the antiprotons to be introduced into the Hadron Collider. You cannot make this stuff up. It keeps happening over and over again on Passover. Nissan 1 is April 8th, which is the beginning of the Hebrew year, 14 days before Passover on the Biblical calendar. Nissan 1 was when they

cleanse the temple during Nehemiah's time, there's so many things that happened in the Bible on Nissan 1 and now we've got all these crazy things that are happening on Nissan 1 again.

And if that's not enough, on this same day, April 8th, but 1904, Aleister Crowley, one of the most satanic cult leaders of all time, in the early 1900's said that he was contacted by a god of Egypt named Horus, which just so happens to be the Son God of Egypt, and Horus gave him very specific instructions, that he told them to write down in what's called the 'Book of the Law'. How ironic Horus has a book of the law and God Himself in the Old Testament has the book of the law. God says, 'If you keep My commandments, you will be blessed. If you don't, you'll be cursed'. Maybe the curse is because you're keeping the 'Book of the Law' of Horus, of the enemy, a whole 'nother discussion. But getting back here, look what Horus actually told him, what's in the Book of the Law. So it says this in Wikipedia, "According to Crowley's later statements, on April 8th, he heard a disembodied voice identifying himself as Aiwass, the messenger of Horus...", okay, "...Crowley said that he wrote down everything the voice told him over the course of the next three days and he said, the book proclaimed that humanity was entering a new era, and that Crowley would serve as its prophet. It stated that a supreme moral law was to be introduced in this era. Now, look, here's the supreme moral law, you ready for this? 'Do what thou wilt, shall be the whole of the law', and that people should learn to live in tune with their will. In other words, Horus, the god of Egypt, the sun god, aka Satan himself said, 'Look, here's the book of my law. Do what you want, your will is the most important will.'

Can I ask you something right now, friend? Do you live the will of God or do you live your own will? Because if you let your own mind, will and emotions rule you, then you are keeping the 'Book of the Law' of Satan. It's just that simple. God's will, law, is you keep His mind, will and emotions, you do what His will is and in return, you get life eternal, and you get joy, and you get fulfillment in this life, as well. So, I just thought that was incredibly fascinating that over 120 years ago now, right now, actually, 120 years, to the day, Aleister Crowley contacted a demon, just like what CERN is trying to do, by breaking open the time continuum, and having something come forward. It's not going to be God. It's not going to be an angel. It's going to be a demon and once again, we're going to be faced and forced to deal with that reality. Wow.

"Oh, boy. Are they coming back? That's a good question. We all know the sound from a swarm or brood of cicadas now, for the first time in more than 200 years, two very specific broods of cicadas will be emerging at the same time in 17 states. The last time they actually came above ground, at the same time was when Thomas Jefferson was president."

So yes, this is next that's happening on April 8th, or the time around there, is the cicadas. Within a few days of April 8th, we don't know exactly what day they're going to come out of the ground, but the first time listen to this, two breeds of cicadas are coming out of the ground by the billions, covering a large swath of the United States of America, just so happen to be in the Midwest, the entire middle and lower section of the United States, exactly where the X marks the spot. Okay. The cicadas are coming out of the ground, and the last time that mankind has seen these...get this, not a single person alive has seen them... 1803.

So these might be all coincidences, ladies and gentlemen, but you've got things coming out of the ground, all right, that literally sound like right out of the book of Revelation. We've got the Hadron Collider firing up on April 8th, NASA launching something with a mission named after an Egyptian god, you have the devil's comet, you got a solar eclipse happening all at the same

time. All of these things are happening and that's not even it. You have the red heifers that are literally moments from being sacrificed in Israel. Israel gave permission to the Temple Institute to sacrifice these red heifers, so that they can begin the process of doing daily sacrifices, which first they've got to build a temple and that's going to cause all kinds of problems. But Israel found out that there was so much pushback by Hamas, by the Arabs, by the Palestinians, and that there was a threat even by Hamas, saying that part of this war that they started was, in part...they released a statement saying...in part, because of these red heifers, they do not want anything happening on that temple mount around the Al-Aqsa mosque, in the Dome of the Rock up there. That's their deal up there. From their perspective, they don't want anything happening up there with their mosque and with the Dome of the Rock. And so, part of the Hamas-Gaza war right now is because of that, and because the threat level went up, Israel retracted, just recently retracted their permission for the for the Temple Institute to sacrifice these red heifers. So they're putting it off, but it won't be for long right now. They're in Shiloh protected.

And now, you may not understand the red heifers. Maybe you're saying, 'What are you talking about, about these red heifers?' The red heifer sacrifice, according to Torah, the 'Front of The Book' is necessary for Israel to begin doing sacrifices again. Now, why is that important to you as a believer today? Because Daniel chapter nine says that the Antichrist is going to interrupt the daily sacrifice, so that means there has to be a sacrifice in order to be daily sacrifices. Or I should say, in order for the Antichrist to interrupt the daily sacrifices, there has to be daily sacrifices to begin with. And in order to do that, the Torah says you must, anytime that temples have been defiled, you must have ashes of the red heifer, and you have to take the ashes, and you wrap that in hyssop and scarlet thread, linen, and wrap it in cedar wood and then you can, the temple will be cleansed.

If you've never heard about the red heifer sacrifice, I encourage you to look at the video that I have on this in detail, it will blow your mind, of how the hyssop, the cedar, the scarlet, all of that is connected to the Messiah, every one of those elements were at the cross, it's incredible. But in any case, it has to be sacrificed in order for the daily sacrifice to begin. It's about to happen for the first time in 1000s of years, they're going to do that. When that happens, the beginning of the end begins. Now we don't know how long it will be before a temple could either be built. Or they could do it in Shiloh, because that's currently where they're being held right now, and the first temple, the tabernacle was in Shiloh. They could easily build a tabernacle way faster, they could build a temple, and they could sacrifice the red heifers there. They could do the sacrifices every day. They're the daily sacrifices. So we don't know what's in their mind, but I'm telling you crazy things are happening on April 8th, and around Passover, this year, is a very special time.

There's one more thing. There are five planets, my friends aligning on April 8, along with everything else, you've got five planets like we have Earth will be in alignment with Venus, Neptune, Saturn, and Mars. Now, I don't know this significance of all that, there's a lot of people smarter than I am that will go into the prophetic detail and the symbolism of each one of those planets, but I can tell you, it rarely happens in Earth history. And so, when five planets line up, okay, out of eight, on a solar eclipse on Nissan 1 with the devil's comet, hasn't been around in 71 years, right, with cicadas that haven't been out since 1803, just a few short years before the War of 1812 and the biggest earthquake in the continental United States history, along with red heifers being sacrificed, a Hadron Collider that is fixing to open up the time-space continuum. And all of this is happening on the same day.

Now I am the last one to put out a conspiracy theory, I don't even hardly do videos like this, because I'm a deep-dive Bible teacher. It's what I do, I teach people how to live the Word of God from its original, ancient perspective removing itself from all the traditions and doctrines of man, of the Roman church and the red headed stepchild of the Catholic Church, the Protestant movement, and really get back to doing Bible things in Bible ways and let God put...infuse the power of God into your life and your family by doing those things. Going out on a limb like this, and getting into current events is not something that I normally do, but I believe so strongly that the coincidences here just, mathematically, don't line up, it's worth us taking a look at. And so, as we close this broadcast, I just, I want you to take the position of not mocking all of the coincidences, but be a wise leader, just to be safe. We should take a look at these things and alter whatever we're doing, just in case, and again, I am not saying that anything is going to happen, but what I am believing is something is going to happen in the prophetic realm, because anytime that you see solar eclipses like this, anytime you see these kinds of patterns happening, normally, we never see anything on the day, but we will see things begin to manifest in the earth realm, just like you don't see a baby formed on the day that it's conceived. No one even has a clue for months, then all of a sudden, something begins to happen, the mom begins to get sick, the abdomen begins to swell a little bit and pretty soon they take a test and realize, 'Oh, something did happen months ago'.

God spoke to me last fall, 2023, and said, '2024, I'm going to begin the process of birthing something in the earth realm'. I didn't know what it was, I still don't know exactly what it is, but I can tell you that we need to be watchmen, we need to be careful, we need to be prayed up and we need to be ready. For 2000 years, or 1700-and-something, to be exact, we have been lazy, we have been doing a Roman things, we've been doing traditional things and traditional holidays, we don't even know anything about the Feast-Days of the Lord, shame on us. The entire Bible timeline, first and second-coming of Christ is written all inside of the Feast-Days of the Lord. Even Paul says that we should keep the Feast of Passover, but do so with a sincerity and truth.

So anyway, ladies and gentlemen, I'm Jim Staley, with Passion For Truth Ministries. Please, if you like this video, comment below, tell me what you think about any of these things, subscribe to our channel and more importantly, share this with everyone that you know. I do believe time is short. Is it going to happen in our lifetime that we see that white horse? I absolutely believe so. Do I believe it's going to happen this year or tomorrow? Absolutely not, but these events are building, and we need to keep an eye on them because it's going to happen at some point. Well, my friends thank you for taking the time to spend with me in this broadcast. I'm Jim Staley with Passion For Truth Ministries, and I will see you in the next video.
